

POLLY PLUS

INTERMEDIATE RYEGRASS

- High forage quality
- Good persistence
- Excellent seedling vigor
- Good grazing tolerance
- Adapted for hay, silage, and grazing
- Rapid establishment
- Traffic resistant
- Improved digestibility
- Disease resistant
- Better summer yields
- Perennial

Adaptation	
Grazing	Excellent
Hay	Excellent
Silage	Excellent
Green chop	Good
Overseeding	Excellent
Frost seeding	Good

Polly Plus can be used for hay or silage production, as well as intensive grazing, with excellent results. The fact that Polly Plus is suited for haying as well as grazing makes it very useful in mixtures with other grasses and legumes.

Compared to other hybrid ryegrasses, Polly Plus has better disease resistance, and the regrowth after cutting has very few stems, which results in extremely high forage quality.

Polly Plus is the perfect choice for spring or fall overseeding of thinning pasture and alfalfa stands to increase productivity.
